Water Conservation & the Village of Midway

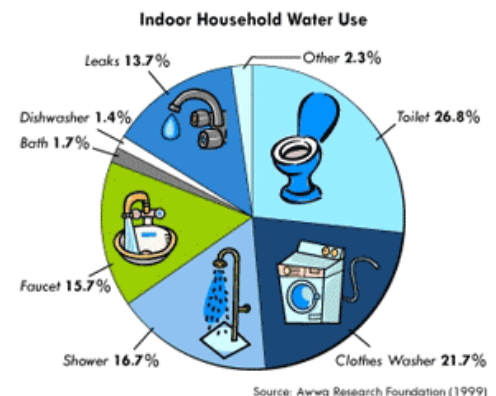

The Village of Midway requests that all residents do their part to conserve water on a daily basis. Drought conditions can happen quickly. Conserving water now can help us in late summer.

Watering restrictions in the Village of Midway are always in effect per Bylaw No. 413 and sprinkling/irrigating lawns and gardens between the hours of 10:00 am and 6:00 pm is prohibited.

The Village recommends watering/irrigating once a day and on alternate days.

Water conservation is everyone's responsibility, including residents on their own wells. Village water and well water originates from the same aquifer, and if levels continue to drop then we all suffer.

The Village would appreciate it if well owners followed the same water regulations as everyone else.

Easy tips to help conserve water – and still have a healthy lawn and garden!

- Lawns and gardens require only 35 millimetres (~1.5 inches or enough to fill a tuna can) of water per week during warm weather. Less is needed during spring, fall, and cooler weather.
- Do not over-water to compensate for expected dry periods. Soil cannot store extra water.
- Water lawns every three to five days, rather than for a short period of time every day. This will help grow deeper roots, making your lawn more tolerant to hot summer temperatures.
- Raise your lawn mower blade to cut grass no lower than eight centimetres (three inches). Longer grass also helps feed the roots and retains moisture, reducing the need for it to quickly regrow.
- Choose water-efficient plants and consider xeriscaping.
- On days when it has rained, turn off your automatic irrigation system.
- Adjust sprinklers so that water does not run down your driveway or street.
- Adding a few inches of mulch to your gardens keeps your plant's roots cool and moist.
- Municipal water is for domestic use only and for your own property, not your neighbours.

The Village of Midway reserves the right to disconnect offenders from the water service, and any service that has been disconnected will be charged a minimum of \$50.00 before service resumes.
